- Stakeholder Mgmt

Strategic Acumen

- Strategic Thinking
- Decision Making
- Innovation

AI Enthusiast

- Hands-on usecases for AI
- AI Industry Awareness
- Passion for AI Trends

Professional experience

Head of Sales
Byens Handel
December 2023 - Present

- Developed and implemented the sales strategy from scratch, including comprehensive market analysis, competitive pricing models, and targeted early-stage customer acquisition strategies, successfully generating traction and initial customers despite initially lacking a demonstrable product.
- Established a strategic partnership with "Handelstandsforeningen," a Danish trade association present in nearly all Danish cities, significantly accelerating early growth, facilitating bulk sales, and improving market penetration and credibility.
- Designed and operationalized tailored customer journey frameworks and sales processes. Upon closing a sale, coordinated seamlessly with our onboarding specialist (second hire in Byens Handel) to promptly guide new business owners in effectively utilizing the app, including creating their initial advertisements and discount listings.
- Leveraged strategic partnerships to effectively prepare, target, and secure potential customers prior to entering new markets, utilizing local insights and trusted expertise from Handelstandsforeningen to optimize sales effectiveness.
- Selected and implemented structured internal systems and documented clear procedures for systematically tracking and managing prospect and customer interactions, ensuring detailed visibility for future visits and follow-ups.
- Successfully grew customer base from 0 to 150 business customers, capturing approximately 30% of potential targeted businesses in each city entered, significantly strengthening the company's market position and revenue potential.

Head of Damage & Administration
Novasol
October 2022 - October 2023

- Led the international Damage & Administration department, overseeing property damage cases, insurance-related incidents, and minor damages handled internally without involving external insurance providers, across 20 European countries.
- Held full Profit & Loss responsibility, successfully achieving a profit of 360 million DKK during my tenure.
- Created and implemented an internal comprehensive knowledge database, providing employees easy access to guidelines, system procedures, and real-time updates (e.g., regional burning bans due to weather conditions), resulting in significantly improved workflow efficiency, reduced errors, and faster internal communication.
- Negotiated improved insurance terms by strategically leveraging existing mandatory private fire insurance coverage in Denmark. Removed redundant fire coverage from our policy while maintaining complete protection for customers, resulting in a 10% cost reduction in insurance premiums without compromising coverage quality.
- Centralized operational processes by channeling all damage cases from 31 local and multiple foreign offices directly to my department. This ensured complete oversight and control, eliminating backlog and significantly reducing case resolution times from months to mere days. Additionally implemented measurable KPIs for timely internal handling and external responses to insurance providers.
- Modernized the "Minor Damage" concept by replacing ineffective paper-based reporting forms with a streamlined digital process. Property owners could directly contact a centralized service via phone or email, quickly receiving reimbursement for minor damages (under 1,000 DKK) upon submission of purchase receipts. Enhanced operational efficiency, reduced administrative burden at local offices, and proactively monitored damage data to detect and prevent potential fraud or abuse of trust-based reimbursements.

Incident Manager
TDC
February 2019 - July 2022

- Served as daily meeting leader for the "Daily Pulse" forum
- Optimized processes for fiber, coax, DSL, mobile, and mobile broadband
